Cosmetic Surgery Cost Worksheet

Use this worksheet to estimate and compare the real, all-in cost of each cosmetic procedure for your situation — before you talk to anyone.

How to use it

Write down the procedure you're considering, then fill in each line as you research or ask a surgeon. Compare the totals side by side. Remember these are estimates, not quotes — always confirm in writing.

Line items that add up

The advertised number is rarely the full number. Make sure you account for each part below — surgeon's fee, facility, anesthesia, and aftercare are often quoted separately.

Questions that change the price

- What is the full, written, all-in price — surgeon, facility, and anesthesia?
- Is the consultation fee credited toward surgery?
- What does follow-up care cost, and what if a revision is needed later?
- Is financing offered, and what is the true total with interest?

Compare safely, don't rush

Get more than one opinion. The lowest quote is not always the safest choice. A board-certified surgeon who sets honest expectations is worth more than one who promises a guaranteed result — because no honest surgeon can. Safety and credentials come before price.

Procedure	Typical US range	Your estimate
Rhinoplasty	\$6,000–\$15,000	\$ _____
Breast augmentation	\$6,000–\$12,000	\$ _____
Liposuction (per area)	\$3,000–\$8,000	\$ _____
Tummy tuck	\$8,000–\$15,000	\$ _____
Facelift	\$10,000–\$25,000	\$ _____

Contour Edits

Free, honest cosmetic-surgery guidance

Consultation	\$0-\$300	\$ _____
